Please see the Starred Assembly Question at page 1 c.f.

Clause (a):

South Kanara district is being treated as a self sufficient district, for the reason that the normal per capita production of rice in the district is ~~410~~ 398 lbs. Even this year the per capita production of rice is 385 lbs. The answer may be given accordingly.

Clause (b):

The estimated area under paddy in 1950--51 is 5,58,000 acres and the yield of rice this year is 2,38,000 tons. This works out to ~~956~~ 955 lbs. per acre. This figure may be furnished as answer.

Clause (c):

According to the figures furnished by the Pub. (E. & S.) Deptt. total acreage under paddy in 1950-5 in South Kanara district is 5,58,000 acres. This may be furnished as answer.

Subject to orders a draft answer is submitted for approval.

23/2/51.

23/2/51

S/ Orders

In view of the fact that we have been supplying S. Kanara with food grains in the past few years & also in view of the various protests received, I would suggest that the figures might be verified

23/2/51

Pub (E.S)

Public (E & S) Department

To R.O.

Please see F & A Department's notes and the remarks of the Secretary, F & A Department, above. The area under paddy in the South Kanara District in 1950-51 was estimated at 558000 acres and the yield of Rice at 238000 tons. The S.F adopted was 95.

of the district in terms of adults

Assuming the ~~entire~~ population for 1950-51 to be = 1386000 ~~for South Kanara District~~, the per capita production works out to 385 lbs per adult.

The normal production of rice in the district is 246000 tons and the normal per capita production works out 398 lbs per adult

The yield per acre attained in 1950-51 is 955 lbs. The figures furnished by F & A. Departments have been verified and found to be correct except the normal per capita prod. given in the dt. With these remarks the file may be returned to F & A Department.
